

Human Rights, Sustainable Development & Design for Eliminating Extreme Poverty by 2030

Join this practical, engaging and important nine days to transform the world. Join the 12th annual

Global Solutions Lab

where you design solutions to global and local problems

June 19–27, 2016

- Join students, teachers, and professionals from around the world*
- Work intensely in small cross-cultural teams
- Develop real-world solutions to real-world problems
- See what we can do, together, to make the world better

Ever heard about a cool innovation and said, “I wish I’d thought of that!”? The **Global Solutions Lab** gives you the skills to do just that with a strategic design and planning, problem-solving methodology developed by Buckminster Fuller and other scientists and designers.

2016 Global Solutions Lab

When: June 19–27, 2016

Where: The UN, New York, and Chestnut Hill College in Philadelphia, PA.

What:

1. be briefed by expert UN staff
2. develop designs and solutions
3. present these at the UN
4. have your project published in a book

Cost: Lab tuition \$1,050. Discount for early registration. Partial scholarships available in special circumstances.

Sponsors: BigPictureSmallWorld, Global Education Motivators, Pacem in Terris, and EarthGame

Contact: 302.656.2721
info@bigpicturesmallworld.com

The Lab focuses its efforts on the **United Nations'** new Sustainable Development Goals that see to eliminate extreme poverty by 2030. We begin with briefings by UN experts (from the UN Development Program, UN Environmental Program, UNESCO, UNICEF, WHO and other UN agencies). Then, after an intense, fast-paced and fun project-development stage, we go to New York so you can present your project at the UN to UN officials, corporate executives and foundation leaders.

You will gain:

- Lifelong leadership and problem-solving skills that give you an understanding of resources, technology, options and culture, and what you can do to make a difference.
- A project worthy of development which will be included in the next publication of the book, *Designing a World That Works for All*.
- A graduate certificate and a powerful experience.

*Previous Lab participants have come from Australia, Canada, China, England, France, Ghana, Georgia, Germany, Haiti, Hong Kong, India, Israel, Jamaica, Japan, Lithuania, Mexico, Namibia, Nepal, New Zealand, Nigeria, Pakistan, Palestine, Poland, South Sudan, Spain, Sudan, Tanzania, Taiwan, Turkey, Uganda, Ukraine, Venezuela, Zimbabwe, and all over the US.
