Jonathan Winkler

On

**“The Historical Roots of the
Snowden Revelations”**

Thursday,
April 23, 2015

3:30 PM

Gladfelter Hall
9th floor,
Weigley Room (914)

Dr. Winkler's address will describe the steady development of the global communications grid with the U.S. at the center. He emphasizes that this grid is the overlooked - and perhaps more essential - component to understanding the recent revelations about the NSA's monitoring of global communications. This is a study in an intricate but overlooked collision of diplomatic, military, strategic, and technological history. Jonathan Winkler is associate professor of history at Wright State University in Dayton, Ohio.
